HSS-AZ AND HSS-ZA

The finishing touch for every lab

HSS-AZ

HSS-ZA

Technical information

Whether it's the powerful HSS-AZ wet trimmer or the perfect HSS-ZA combination trimmer with additional polishing spindle: excellent results guaranteed for dental models, thanks to their powerful motors and the nearly wear- and maintenance-free technology used. A wide range of application makes the use of the segmentally diamonded Dia-Quick grinding disc or the aggressive foil grinding disc (usable on both sides) possible. Because motor cooling takes place in the outer housing, dirt cannot be drawn in. And both units are low-noise and vibration-free, of course.

- powerful HSS-ZA wet trimmer with polishing spindle
- highest cutting and polishing speeds (HSS-AZ: 3000 min⁻¹, HSS-ZA: 2 settings - 1500 and 3000 min⁻¹)
- can be used with aggressive foil-grinding disc or segmentally diamonded Dia-Quick grinding disc
- sturdy, oxidation-free bench with longitudinal slots and side openings – no water spills possible
- HSS-ZA standard with solenoid valve for automatic water supply
- powerful disc and internal rinsing
- easy to open using rear handle
- splash-protected as per IP 54
