

Automatic Stand

USER MANUAL

Dear customer,

Thank you for choosing a product from the Wassermann range. Wassermann Dental-Maschinen incorporates the highest standards of quality and the latest technology. In order to enjoy maximum performance and years of trouble-free operation, please read this user manual carefully before you connect this device and start work, and operate the device according to the recommended guidelines. The operation safety and the functionality of this device can only be guaranteed if you follow both the general safety guidelines and the applying laws to prevent accidents as well as the precautions given in this user manual. We are not liable for any damages which occur due to inappropriate usage or faulty operation of this device.

Make sure that anyone using this device has read and understood this user manual.

Keep this user manual in a safe place where it can be referred to as required at any time.

The unit complies with the relevant EU guidelines.

The unit is subject to the EU guidelines 2012/19/EU (WEEE Directive).

1 Features

The automatic stand by Wassermann offers a robust and ergonomic working surface of high quality that is adjustable in height to suit individual requirements. It makes the workplace much healthier and more active by allowing to work while standing and sitting alternately. Both, health and efficiency will profit from this investment. Ergonomics at the workplace promotes concentrated, relaxed and productive work. The more varied the workplace design, the better it is for the body and performance of the operator.

- Automatic stand for ergonomically optimised working
- The user can adjust it to any body size in seconds
- Equipped as standard with overload protection of motor
- Plate made of steel with robust plastic powder coating,
W x D: 675 x 560 mm, suitable for almost any equipment on the market
- Adjustable from 740–1090 mm,
allows to change between standing and sitting at work
- With a maximum lifting capacity of 120 kg
- Easy to operate using the foot switch

2 Safety Symbols used in this Manual

Warning!

This is a warning of risk situations and dangers.
Failure to observe this warning could be life-threatening.
These warnings has to be observed.

Information!

This symbol draws your attention to specific features that has to be observed.

3 Safety Guidelines

Configuring and operating this equipment requires **precise knowledge** and **observance** of the instructions in this **user manual**. The equipment is designed only for its intended application.

WARNING:

Servicing and repairs should be carried out only by authorised specialists.
Disconnect the power plug before starting any maintenance work.

Make sure that the equipment is connected to the correct power source.

Attention! Danger of bruise!

- When moving the stand take care that you will not bruise your limbs!
- In sitting position do not cross the legs when moving down the stand!
- Do not wear shoes with thick soles!
- Do not use chairs with arm-rests!
- The stand is only allowed to be moved by the user self!

4 Responsibility for Operation or Damage

The responsibility for operating the device lies exclusively with the owner or user if said device is incorrectly serviced, maintained or altered by persons not employed by an authorised dealer or if the device is used in a manner contrary to its specified purpose. The unit has to be maintained and operated in accordance with this user manual. Wassermann Dental-Maschinen GmbH is not responsible for damage arising from the **nonobservance** of these instructions.

Warranty and responsibility provisions contained in the sales and supply conditions of Wassermann Dental-Maschinen GmbH are not extended by these instructions.

5 Application

The Automatic Stand is a motor-driven lifting table. It enables different user to work in an ergonomic position adjusted to every ones own necessities.

The Automatic Stand is designed for our polishing compact unit WP-Ex 3000 II (as an example). But it can also be used with other machines.

Only use the device for this type of application.

6 Before Starting

6.1 Storage

The unit location is very important when it comes to workplace safety, even if it is only to be set up there for a short period. The room should be dry, well ventilated and vibration-free. An even temperature and wooden supports also help. The unit should not be stored or set up outdoors. If the unit is to be stored for an extended period, protect it from moisture and dust.

6.2 Transport

Before transporting the unit, ensure that it has been unplugged from the power socket. Make sure that it is packed correctly in order to avoid accidental damage.

Be sure to check for any transport damage when unpacking the goods. Note down any damage if found.

6.3 Installation

Open the box, remove the packing materials, and carefully lift out the device.

Install the device in a place where it will not block the working area and the functionality (take the dimensions into account).

The device has to stand horizontally on a steady and even surface.

Unevenness of the bottom can be trued up through the rubber feet; a wrench is enclosed:

Fig.: Trueing up of unevenness of the bottom

Place the unit, e.g. the WP-Ex 3000 II, onto the supporting frame.

Do not install the unit outdoors or in places without proper ventilation.

Before start-up, be sure the device reaches room temperature.

7 Installation/ Start-up

Please see the safety guidelines on page 5.

Before starting the unit, connect up the following:

Connect the unit to the connection box (power cable).

1. Insert the power plug into the socket, making sure that the mains and the unit operate on the same voltage (220-240 V / 50/60 Hz).
2. Switch on the main switch.
3. Use the foot switch (located at the bottom of the stand foot) to move the Automatic Stand to the desired position.
4. The Automatic Stand can be stopped and switched off in any position.
5. Power is only supplied when the main switch is switched on.
6. Switch off the main switch after using or finishing work.

The integrated self-locking main spindle prevents the Automatic Stand from inadvertent sagging down.

The motor of the Automatic Stand is equipped with an **overload protection** to prevent the motor from damages caused by overheating. Should the stand stop suddenly during operation, the protection switch is activated and will be reset automatically **after a few minutes cooling down**. Then the unit will function as normal.

Disconnect the power plug when not using the unit for a long period of time.

8 Operation

8.1 General Operating Instructions

All instructions for using the unit, whether in verbal or written form, are based on our own experience and experimentation and can only be regarded as guidelines.

1. Switch on the main switch.
2. Use the foot switch (at the bottom of the stand foot) to move the stand to the desired position.
3. Press the foot switch until the stand has reached the desired position.

Please see the safety guidelines on page 5.

9 Troubleshooting

Fault	Cause	Solution
Stand position cannot be changed.	Power plug is not connected.	Check the power plug and connect it.
	Main switch is not switched on.	Check the main switch and set it to the „On“-position.
Stand stops suddenly	Motor overload protection is activated due to overheating.	Wait and let the motor cool down a few minutes. Protection switch will be reset automatically.
Stand does not start moving	Stand is overloaded	The axial load must not exceed 120 kg
	Improper application	Stand must be used for the determined purpose only.

If the above recommendations do not solve the problem, contact your dental depot or our service department.

10 Care and Maintenance

10.1 Cleaning

Disconnect the power plug before starting any maintenance work.

The identification plate has always to be kept in easily legible condition and has not to be removed.

Remove external dirt from time to time with some form of cold cleaner.

Use only cold cleaners to avoid damaging the paintwork or removing the lettering.

The equipment should be cleaned at regular intervals to ensure trouble-free operation.

It requires only normal cleaning (sponge, damp cloth, mild detergent) and no further chemical additives.

10.2 Maintenance

The unit does not require any servicing. Just make sure that the device is kept clean.

10.3 Warranty

The warranty period for our equipment is 12 months. If faults occur within the warranty period, contact your dental depot or get in touch directly with our service department.

Your equipment should only be operated in perfect condition. If faults occur which could harm operators or third parties, the unit should not be used until it has been fixed.

This warranty does not cover damage caused by improper use, external mechanical causes, transport damage or interference with the unit by unauthorized persons.

10.4 Spare Parts

If necessary please contact our service hotline phone.

10.5 Service Hotline 0049 (0)40 730 926 -20/ -24

10.6 Scope of Delivery

Included parts	Item no.
Automatic Stand, 1 piece	146170

10.7 Repairs

Servicing or repairs to the unit has only to be carried out by qualified technicians. Only original spare parts are to be used. Responsibility for the product is voided if unauthorised persons alter it or if inappropriate components are installed.

11 Technical Data

Automatic Stand	Item no. 146170
Voltage*	220–240 V / 50 / 60 Hz
Power consumption	3.1 A
Output	660 W
W x min./max. H x D	675 x 740/1090 x 560 mm
Weight	39.7 kg
Stroke	350 mm
Max. load	1200 N (axial) / 120 kg
Lifting speed	ca. 20 mm / sec.

*Other voltages on request.

The noise level of the unit amounts to ≤ 70 dB (A).

Technical changes reserved.

12 Disposing of the Unit

The unit has to be disposed by an authorized recycling operation. The selected company has to be informed of all possibly health-hazardous residues in the unit.

12.1 Information on Disposal for Countries within the EU

To conserve and protect the environment, prevent environmental pollution and improve the recycling of raw materials, the European Commission adopted a directive that requires the manufacturer to accept the return of electrical and electronic units for proper disposal or recycling.

Within the European Union units with this symbol should not therefore be disposed of in unsorted domestic waste.

For more information regarding proper disposal please apply at your local authority.

13 EU Declaration of Conformity

in accordance with 2014/35/EU (Low Voltage Directive) and 2014/30/EU (Electromagnetic Compatibility Directive) and 2006/42/EC (Machinery Directive) and 2011/65/EU (RoHS Directive)
